Septic Tank Hollow Leaching Structures (galleries, drywells, etc.) Cesspool

Other (explain): _____

Components/structures emptied (pumped) by a cleaner licensed pursuant to CGS Chapter 393a?

Yes No If yes, date pumped: _____ Pumper: _____

According to the Technical Standards for Subsurface Sewage Disposal Systems (Revised January 1, 2018), Section II. D. **System Abandonment:** Abandonment of subsurface sewage disposal system components (i.e., septic tank, hollow leaching structures) or cesspools shall be performed in such a manner as to eliminate the danger of the system components or structure inadvertently collapsing. The responsibility for abandonment lies with the property owner. Structures that are to be abandoned shall be emptied of all sewage/wastewater prior to abandonment. Structures shall be filled with sand, gravel, or crushed, and the area backfilled with clean soil.

SUBMIT site plan or sketch drawn to scale (Example 1 inch = 20 feet) with this application.

Plan must show property lines, house location, septic tank, system, well and proposed location of public sewer lateral.

SUBMIT asbuilt of sewer lateral location and well upon completion of work
